1. CUSTOMER SEGMENT(S)     • Farmers who trying to protect crops     from various problems	cs	CUSTOMER LIMITATIONS EG. BUDGET, DEVICES     Limited supervision.     Limited financial constrains.     Lack of manpower.	S. AVAILABLE SOLUTIONS PLUSES & MINUSES              •CCTV camera tomonitor and nsupervise the becrops.
2. PROBLEMS / PAINS + ITS FREQUENCY	PR	9. PROBLEM ROOT / CAUSE  *Due to in sufficient labourforces.  Due to various environmental factors  such as temperature climate,to  pography and soilquality which results  incrop destruction.  *Due to high ammonia,urea,  potassium and  highPHlevelfertilizers.	*Asks suggestions from surrounding peoples and implement there cent technologies.     *Consumes more time in cropland.     *Searching for an alternative solution for an anexisting solution.
3. TRIGGERS TO ACT By seeing surrounding cropland with installing machineries.  • Hearing aboutinnovativetechnologies andeffective solutions.  4. EMOITIONS one due to insufficient a production of crops.  • Felt smart enough to follow the available technologies with minimum cost.	TR	measure the moisture level in soil and relay issued toturn ON and OFF the motorpump for managing the excess waterlevel.  It will be updated to authorities through IOT.  Temperature sensor connected to microcontroller issued to monitor the temperature inthe field. The optimum temperature required for crop cultivation is maintained using  .  IOT basedfertilizingmethodsare followed,to minimize the negative effects on growth of crops while using fertilizers	8. CHANNELIFE of PREHAVOR media ONLINE to describe the working and uses of smart crop protection device.  OFFLINE Giving awarenes among farmers about the application of the device.
